SUMMARY

Full-stack software engineer who has shipped production software for the web, Android and Windows. SDE-3 at Elina Club, Co-Founder & CTO of a stealth startup, and founder of Kiteloom. I use Claude Code daily to ship secure, well-tested code. Looking for an SDE 1 / SDE 2 role.

EXPERIENCE

Elina Club Pvt. Ltd Jul 2026 – Present
SDE-1 & Chief Advisor *Bathinda, India (On-site)*

- Only engineer at the company: I own frontend, backend, database, automation and deployments, and advise leadership on product and tech decisions.
- Built and shipped two production web platforms on Next.js 16, React 19 and TypeScript, from first commit to live site; about 350 commits in under three months.
- Designed the Postgres (Neon) schema and APIs behind the lead, careers, feedback and newsletter forms, with server-side Zod validation and Upstash Redis rate limiting.
- Wrote the admin panel: filterable lead tables, Excel export and viewer/editor roles, on signed httpOnly sessions with scrypt-hashed passwords.

Stealth Startup Jul 2026 – Present
Co-Founder & CTO

- Co-founded an early-stage company that is still in stealth; I own the technical direction, architecture and engineering.

Kiteloom | kiteloom.com Jan 2026 – Present
Founder

- My own product: an infinite canvas where sketches, wireframes and diagrams are the same object, with real-time multiplayer on Yjs CRDTs (Next.js, TypeScript, Convex).
- Better Auth (email, Google, 2FA), Paddle billing, per-user rate limits and Sentry. 70+ unit test files and Playwright end-to-end tests run in GitHub Actions. Ships in 11 languages.

Trupeer AI | trupeer.ai Jan 2026 – Jul 2026
Full-Stack Intern *Bengaluru, India (On-site)*

- Moved subtitle processing from the server into the browser with FFmpeg WASM and ElevenLabs Scribe v2, cutting compute costs by about 70% and adding support for 90+ languages.
- Rebuilt the Chrome extension recorder on the WebCodecs API with chunked IndexedDB writes, so recordings longer than 30 minutes stopped losing data. Added upload retries with exponential backoff.
- Hardened password reset with Redis sliding-window rate limiting, short-lived JWTs and reCAPTCHA v3; set up Vitest from scratch across Auth0, Stripe, Intercom and Mixpanel code.
- Only intern on the Next.js App Router rewrite: typed REST client, Zod validation, webhook-driven optimistic UI.

PROJECTS

Edgepad | github.com/akshit-bansal11/edgepad Kotlin, C# / .NET 10, Bluetooth RFCOMM

- Turns an Android phone into a trackpad, media remote and gamepad for a Windows laptop over direct Bluetooth using a wire protocol I designed. Open source, 25 GitHub stars, 215 commits.

Lokey | github.com/akshit-bansal11/lokey Rust, Tauri, TypeScript

- Local-only encrypted vault for passwords and environment keys on Windows: Argon2id, AES-256-GCM, no network code, signed release attestations.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, Go; Kotlin, Rust and C# in my own projects
Frontend: Next.js, React, Tailwind CSS, shadcn/ui, Motion, GSAP
Backend & Data: Node.js, Express, REST, WebSockets, Convex, PostgreSQL (Neon), MongoDB, Redis (Upstash), Firebase
Security & Testing: Better Auth, Auth0, JWT, OAuth, 2FA, rate limiting, reCAPTCHA, Vitest, Playwright, RTL
Mobile, Desktop & Tools: Android (Kotlin), Tauri (Rust), .NET (C#), Claude Code, GitHub Actions, Vercel, Sentry, Figma

EDUCATION

B.Tech, Computer Science & Engineering, Maharaja Ranjit Singh Punjab Technical University Aug 2022 – Jun 2026
